

**DELIVERING  
BENEFITS TO  
ENTERPRISE**

**LOWER COST**

Lower costs

# Automation by Agent

## PROBLEM

We spend a lot of time on repetitive day-to-day tasks. And our mobile workforce isn't always connected to the corporate network - so how can we control security?

## SOLUTION

Automation by Agent: All tasks are run by an independent agent directly on the endpoint, even without connectivity to ESET Remote Administrator. Results (logs) are then synchronized upon connection.

## BENEFIT

IT administrators' day-to-day tasks are minimized, saving time and allowing them to focus on more important or sophisticated tasks.

Lower costs

# Built-in Data Access Protection

## PROBLEM

We need to manage online and offline data access but dedicated tools are expensive, need additional management, and increase endpoint hardware demands.

## SOLUTION

Built-in Data Access Protection. ESET Endpoint Security comes with built-in Anti-Phishing, Device Control, Web Control, Firewall and other functionalities to cover these security demands.

## BENEFIT

No need to pay for and maintain dedicated tools, or upgrade your hardware to cope with them.

Lower costs

# Two-factor Authentication

## PROBLEM

Two-factor authentication systems are expensive. They need dedicated infrastructure and hardware, and deployment and setup is time-consuming and expensive.

## SOLUTION

ESET Secure Authentication, our mobile-based two-factor, one-time password (2FA OTP) solution, is easy to deploy, and can be set up in just 10 minutes.

## BENEFIT

No extra hardware is needed – you just use your mobile phone to generate a unique password. ESET Secure Authentication is easy to install and deploy on your current network infrastructure.

Lower costs

# Mobile Devices Secured

## PROBLEM

Mobile device management (MDM) addresses many BYOD challenges but is expensive and complex to deploy, and represents yet another management tool.

## SOLUTION

With ESET Endpoint Security for Android you retain control of all your devices via ESET Remote Administrator.

## BENEFIT

No need for an expensive MDM tool - with ESET Remote Administrator, you can manage device security alongside desktop and server security.

Lower costs

# Virtualization Support

## PROBLEM

We are virtualizing our network and are afraid of AV storms and the overall performance of anti-malware solutions on virtual machines (VMs).

## SOLUTION

Virtualization Support: ESET Shared Local Cache prevents scanning of the same files on all VMs. Moreover, an agentless solution is available for platforms supporting such an approach.

## BENEFIT

Your VMs run faster because ESET's anti-malware solution won't slow them down. There's no need to upgrade your hardware to offset degraded VM performance when running ESET.

Lower costs

# Proxy Servers for Remote Administration

## PROBLEM

Getting security logs and data from distant locations takes time and resources. Syncing the data into one database causes problems with data integrity, which demands yet more resources.

## SOLUTION

Proxy servers. No need to install multiple ESET Remote Administrator servers as proxy servers gather and forward the logs you need to aggregate security events and threat intelligence for your company.

## BENEFIT

Saves money by only using the number of servers you really need, and by improving data flow and reducing admin workload.

Lower costs

# ESET License Administrator

## PROBLEM

Our IT budget is constantly scrutinized, and costs need to be attributed accurately. But it's difficult to keep track of how many licenses we are using or if we are paying for too many.

## SOLUTION

ESET License Administrator. Our new licensing administrator handles all licenses transparently, in one place – from where you can merge, delegate and manage them centrally, in real-time.

## BENEFIT

You get the most out of your licenses, with no seat wasted. Your IT department can plan and manage resources better.

Lower costs

# ESET Remote Administrator running on Linux

## PROBLEM

Microsoft Client Access Licenses (CALs) are expensive.

## SOLUTION

The ESET Remote Administrator server runs on Linux, so you don't need an MS server. ESET is one of only two vendors to offer such a solution.

## BENEFIT

There's no longer any need to pay for CALs for every client that connects when you run ESET Remote Administrator on a Linux sever.

# **MOBILE CAPABILITIES**

Mobile capabilities

# Automation by Agent

## PROBLEM

What if one of our mobile workforce encounters a security issue on their laptop while there is no connection to the remote management tool? Is the laptop secure?

## SOLUTION

Automation by Agent: All tasks are run by an independent agent directly on the laptop, even without connectivity to ESET Remote Administrator. Results (logs) are then synchronized upon connection.

## BENEFIT

Actions are taken to ensure that the highest level of security is maintained for your mobile workforce at all times, wherever they are.

Mobile capabilities

# Built-in Data Access Protection

## PROBLEM

We need to manage mobile workforce data access (to websites, connections, offline devices) – and stricter rules than for in-house users.

## SOLUTION

Built-in Data Access Protection: ESET Endpoint Security comes with built-in Anti-Phishing, Device Control, Web Control, Firewall and other functionalities to cover these security demands.

## BENEFIT

Your mobile workforce's online and offline communications and data stay safe all the time, even when outside your company network.

Mobile capabilities

# Two-factor Authentication

## PROBLEM

We need to be sure that only authorized users can access our systems remotely.

## SOLUTION

ESET Secure Authentication, our mobile-based two-factor, one-time password (2FA OTP) solution, is easy to deploy, and can be set up in just 10 minutes.

## BENEFIT

Only authorized users are able to access sensitive data.

Mobile capabilities

# Encryption

## PROBLEM

Our mobile workforce sends and receives sensitive data. What if the data were to fall into the wrong hands, or if a laptop were lost or stolen?

## SOLUTION

Encryption: ESET features an easy to deploy and manage encryption solution, which is scalable according to your needs.

## BENEFIT

ESET encryption keeps company data secure even if they fall into the wrong hands.

Mobile capabilities

# Mobile Devices Secured

## PROBLEM

Our mobile workforce uses company mobiles, but they must remain malware-free. We also need to retain control if they go missing, and enforce company policies for apps.

## SOLUTION

ESET Endpoint Security for Android allows your admins to stay in control of all your devices without any need for a dedicated mobile device management tool, using ESET Remote Administrator.

## BENEFIT

Keep control of your devices, protect them from loss, and shield the data they hold - immediately.

# **OUTSTANDING USABILITY**

Outstanding usability

# RIP & Replace

## PROBLEM

Migrating from one anti-malware vendor to another demands a lot of time, effort and IT resource – it's easier not to switch.

## SOLUTION

RIP & Replace: ESET Endpoint solutions now uninstall all redundant anti-malware software during their installation, and endpoints are deployed pre-set up.

## BENEFIT

Migration to ESET is seamless – RIP & Replace makes the process easy.

Outstanding usability

# User-friendly Management Console

## PROBLEM

We need a “look & see” security overview that is easily accessible, while retaining full management of IT security.

## SOLUTION

Our new web-console combines extremely user-friendly interface and data visualization with drill-down capabilities, and was developed based on in-depth consultation with IT professionals.

## BENEFIT

Straightforward IT security management via a simple yet powerful web-console, which is completely intuitive to use and accessible from anywhere.

Outstanding usability

# Low System Demands

## PROBLEM

IT security solutions slow down our computers and our people too, leading to complaints from users.

## SOLUTION

ESET is famous for its low demands on systems. All our products are optimized to ensure high-speed running, as confirmed by independent testing.

## BENEFIT

Your computers don't run slower – and nor do your people. The result: no more user complaints.

Outstanding usability

# ESET License Administrator

## PROBLEM

It's difficult to manage licenses dynamically in response to changes in our network. Our IT budget is constantly scrutinized and we need a way to demonstrate spending on licenses is effective.

## SOLUTION

ESET License Administrator. Our new licensing administrator handles all licenses transparently, in one place – from where you can merge, delegate and manage them centrally, in real-time.

## BENEFIT

License handling made easy – manage your licenses centrally, in real-time.

Outstanding usability

# Effective Reporting

## PROBLEM

We need customized reports to get the data we are interested in, especially specific data that we need for compliance reporting and threat intelligence.

## SOLUTION

Reporting: ESET provides extremely flexible reporting, with pre-defined templates for chosen compliances.

## BENEFIT

You can access the reports and information you want, immediately from the system, with no need to format them later.
