# SECURITY SOLUTIONS

FOR EDUCATION

 ESET® ENJOY SAFER TECHNOLOGY™

Spend more time supporting your faculty, staff, students and education initiatives and less time worrying about security issues.

ESET helps you navigate the complex security landscape and minimize risk as you digitize classrooms, manage BYOD users and keep legacy equipment running smoothly. Our solutions address business continuity and compliance issues while keeping budget constraints in mind.

Lower Costs

ESET Remote Administrator running on Linux

There's no longer any need to pay for CALs for every client that connects when you run ESET Remote Administrator on a Linux sever. Instead of paying for licenses, spend the money on education.

Automation by Agent

All tasks are run by an independent agent directly on the endpoint. IT administrators' day-to-day tasks are minimized, saving time and allowing them to focus on other important or sophisticated tasks.

ESET License Administrator

You get the most out of your licenses, with no seat wasted, with clear overview of license usage in real-time. Plan and manage resources better.

Built-in Data Access Protection

No need to pay for dedicated tools for Web Control, Device Control and other Data Access Protection tools or to upgrade your hardware to cope with them.

Virtualization Support

Your VMs run faster because ESET's anti-malware solution won't slow them down. There's no need to upgrade your hardware to offset degraded VM performance when running ESET, leaving more resources for your institution to devote to education.

Mobile Devices Secured

No need for an expensive MDM tool – with ESET Remote Administrator, you can manage device security alongside desktop and server security.

Outstanding Usability

RIP & Replace

Migration to ESET is seamless. ESET Endpoint solutions now uninstall all redundant anti-malware software during their installation, and endpoints are deployed pre-set up.

User-friendly Management Console

Straightforward IT security management via a simple yet powerful web-console, which is completely intuitive to use and accessible from anywhere.

Low System Demands

Your computers don't run slower – and nor do your people. The result: no more user complaints.

Customizable GUI visibility

Users aren't distracted by their anti-malware solution – and may not even know there is any on their endpoint – while having no GUI means even lower system demands.

Choose from ESET's range of IT security products and services to secure your operation and your staff and students' data.

The options below can be activated individually or in combination, for improved IT security.

Endpoint Security

- Antivirus and Antispyware
- Optimized for the Virtual Environment
- Anti-Phishing
- Web Control
- Device Control
- Firewall
- Low System Demands
- RIP & ReplaceW
- Botnet Protection
- Vulnerability Shield
- Exploit Blocker

Server Security

- **Mail Security** blocks malware, spam, spear phishing scams and unsolicited email messages from entering company network
- **File Security** enforces antimalware on your servers, to keep the OS and confidential files free of threats.
- **SharePoint™ Server Security** protects personal data for educational institutions that uses SharePoint as the storage engine.
- **Gateway Security** blocks inbound threats carried in Web and FTP traffic at the network perimeter

Remote Administrator

- Web-console interface with drill-down possibilities
- Utilizes an independent remote administration agent
- ESET Remote Administrator also runs on Linux
- Possibility to deploy as Virtual Appliance
- Server/proxy architecture for network resilience
- Role-Based Management
- Secure peer communication
- Group-centric approach
- Rogue Detection Sensor

ESET Secure Authentication

- Ultra strong, super simple two-factor one-time password authentication
- Helps your operation to comply with industry regulations and keep staff and student data safe
- Easy one-tap installation on mobile phone or tablet
- Prevents security breaches by validating identities
- Designed for a mobile world
- No extra hardware keeps costs low and users happy
- Flexible integration options

ESET Technology Alliance: Deslock+ Data Encryption

- Simple and powerful encryption for organizations of all sizes
- Safely encrypts hard drives, removable media, files and email
- FIPS 140-2 Validated 256 bit AES encryption for assured security
- Hybrid-cloud based management server for full remote control of endpoint encryption keys and security policy
- Support for Microsoft® Windows® 8, 8.1 including UEFI and GPT
- Centralized management

Premium Support

- Highly-trained professionals are at your disposal 365/24/7
- Save on IT-related costs and free up your IT resources to focus on clinical care provision
- Respond to security issues quickly and protect your reputation
- Get priority for your request to increase uptime

Balancing data protection with staff and student productivity are schools' top challenges

What security challenges did your organization face when evaluating and deploying ESET?

Challenge	
Protecting student data, organizational data and intellectual property	79%
Balancing employee and student productivity with strong protection	47%
Meeting regulatory compliance standards (PCI, SOX, HIPAA, FERPA, CIPA)	19%
Strengthening security with encryption or authentication	8%
Maintainaning security while migrating to the cloud	6%
Other	9%

Worry-free Endpoint Security brings tangible results for a Michigan University

"I don't have to worry about it. It has dramatically cut down on end user infection of their machines."
TechValidate Survey of a Educational Institution

Education clients realize quick return-on-investment with ESET

Please estimate how long it took to realize a return on your investment with ESET security solutions.
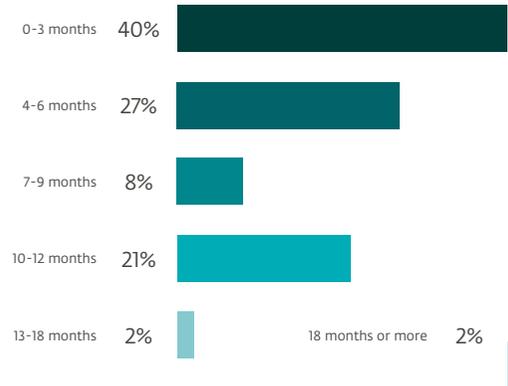

Time	
0-3 months	40%
4-6 months	27%
7-9 months	8%
10-12 months	21%
13-18 months	2%
18 months or more	2%

TechFact: School district likes ESET in their virtual environment

"Muskogee Public Schools selected ESET's agented solution instead of an agent-less solution because of better protection and ease of management."
Eric Wells, IT Director, Muskogee Public Schools

Education customer rates ESET at 10/10, would recommend highly*

"I have had nothing but excellent experiences with ESET."
Brian Messex, IT Director, Wilburton Public Schools

Bryant University: 1K+ systems protected with ESET — light footprint brings immediate ROI

"Wonderful footprint, great proactive server reports, fast definition updates."
Ray Lombardi, IT Specialist, Bryant University

Camelback Academy

"Set it and forget it...it works wonderfully. I'm able to focus on other areas fully confident that my teachers laptops are protected and will stay that way!"
Mark Sunderlin, IT Director, Camelback Academy

Chapman University

"TechFact: Chapman University has avoided damage to their reputation, good will and community trust and reduced IT overhead since deploying ESET."
John Dimitroff, IT Manager, Chapman University

London Christian Academy

"I can set it up and leave it!"
Ken Bignell, Network Administrator, London Christian Academy
